

WET PICK-UPS AND INTERCEPTOR CANISTERS

INTERCEPTOR CANISTER

For Restaurants, Barber/Beauty Shops or anytime it is desirable to keep debris from entering the vacuum tubing inside the walls of a building. Available in plastic or galvanized steel. **Not to be used to pick up liquids.**

Order a short section of hose to connect the canister to inlet (5 ft. length hose IH-205, 1-1/2" x 5' hose with two IHV-160 cuffs). Use the standard 1-1/4" hose to adapt from canister to tool.

NOTE: Do not use the Wet Pick-Up or Interceptor to pickup combustible or hazardous materials.

WET PICK-UP CANISTERS

Order a short section of hose to connect the canister to inlet (5 ft. length hose H-105, 1-1/4" x 5' hose with HC-111 and HV-109 cuffs). Use the standard 1-1/4" hose to adapt from canister to tool (see diagram below).

NOTE: WHEN USING OTHER THAN 1-1/4" HOSE FROM CANISTER TO TOOL, SPECIFY THE DIAMETER OF THE HOSE TO BE USED WITH THE WET PICK-UP. WHEN 1-1/2" OR 1-3/8" INLETS ARE USED, THEN USE IH-205, 1-1/2" X 5' HOSE WITH TWO IHV-160 CUFFS.

ICC-102G
Galvanized Interceptor Canister
Approx. 4 Gallon Capacity

WP-112
Galvanized Wet Pick-Up
Approx. 4 Gallon Capacity

CWP-132
Galvanized Commercial Wet Pick-Up
Approx. 8 Gallon Capacity

MC-125
Flat Triangular Dolly
Will fit all galvanized cans

ICC-210
Interceptor
Approx. 10 Gallon Capacity
2" Connections Only
To connect use IH-301 hose and hose clamps

HP-119
Plastic 1-1/4" Cuff
IHP-170
Plastic 1-1/2" Cuff
For WP-312, CWP-332, and ICC-302

WP312M (A or B)
Plastic Wet Pick-Up Bucket including cart, hose and cuffs.
Approx. 4 gallon capacity

CWP-332M (A or B)
Stainless Commercial Wet Pick-Up. Includes MC-32 Mobile Cart, hose and cuffs. Approx. 5 gallon capacity

ICC-302B
Restaurant Interceptor
Approx. 4 Gallon Capacity
Supplied with hose and cuffs
ICC-302
Restaurant Interceptor
Supplied with **NO** hose or cuffs

A Style = 1-1/4" Connections
B Style = 1-1/2" Connections
